MAGNETRON OXIDATION OF POLYMER FILMS
BY
JOHN F. HANCOCK
The University of Texas at Dallas, Richardson, Texas 75080
(Received 12 November 1974)

ABSTRACT The oxidation of polymer films by magnetron sputtering of oxygen is described. The oxidation of polyethylene, polypropylene, and polystyrene films is studied. The oxidation of polyethylene is studied in detail. The oxidation of polyethylene films is studied in detail. The oxidation of polyethylene films is studied in detail.

The first of these is the *Journal of the American Medical Association*, which has been the most influential of the medical journals in the United States. It was founded in 1882 and has since then been the most widely read and most influential of the medical journals in the United States. It is published weekly and is the most widely read and most influential of the medical journals in the United States.
